Use your graphs and number lines to answer the following questions:

1. Total your runs from all the innings you played. How many runs would you score if you play the same game three times?

answer here

2. Total your runs from all the innings you played. Divide your total by the total number of innings played. What is the average number of runs per inning?

answer here

3. Total your runs and your opponent's runs. What is the difference between your totals? Who won the game?

answer here

4. Which inning had the greatest difference in runs? Which inning had the least difference in runs?

answer here

5. Review your line graphs of strikes: How many times during the game did you strike out the opponent (3/3)?

answer here

6. Review your line graphs of strikes: How many times was your strike fraction greater than ½?

answer here

7. Review your line graphs of strikes: How many times was your strike fraction less than ½?

answer here

8. Review your line graphs of balls: How many times during the game did you walk the opponent (4/4)?

answer here

9. Review your line graphs of balls: How many times was your ball fraction greater than ½?

answer here

10. Review your line graphs of balls: How many times was your ball fraction less than ½?
