

Name: _____

Class: _____

Playing on Ice

GRADES 6-8

Elaborate

Create and label an outline that demonstrates the transformation from a gas to a liquid to a solid. Use lines, arrows, boxes and/or circles to concisely describe each composition's transformation from a few molecules to a defined structure.

Playing on Ice

GRADES 6-8

Evaluate

Draw a scale model of a hockey rink. Depict how the playing surface/ice is created and sustainable using information and data throughout the lesson, including molecular composition and transformation by way of heat/energy before, during, and after a hockey game.
